

Curriculum Vitae
Leslie Thomas Stayner, MSc, PhD

CONTACT INFORMATION

Address: Division of Epidemiology and Biostatistics, UIC School of Public Health (M/C 923), 1603 West Taylor Street, Room 971, Chicago, IL 60612

Telephone: Office:312-927-5554, Mobile:312-927-5554.

Email: lstayner@uic.edu

EDUCATION

1986-1989 **University of North Carolina** Chapel Hill, NC
Ph.D. in Epidemiology with a formal minor in Biostatistics received on August 14, 1989.

1978-1980 **Harvard School of Public Health** Boston, MA
M.Sc. in Epidemiology and Occupational Health and Safety, received on June 5, 1980.

1974-1977 **University of Massachusetts** Boston, MA
B.A. in Biology, Magna Cum Laude on June 2, 1977.

WORK EXPERIENCE

2003- **Professor of Epidemiology and Biostatistics**
University of Illinois at Chicago, School of Public Health, Chicago, Illinois.

2016- **Adjunct Professor**
University of Southern Denmark, Faculty of Health Sciences, Odense, Denmark.

2012- **Adjunct Research Professor**
Center for Research on Environmental Epidemiology (CREAL), Barcelona, Spain

2008- **Director of Occupational and Environmental Epidemiology**
University of Illinois at Chicago Occupational and Environmental Health and Safety Education and Research Center

- 2011 **Visiting Scientist**
Center for Research on Environmental Epidemiology (CREAL), Barcelona, Spain.
- 2003-2010 **Director of the Division of Epidemiology and Biostatistics**
University of Illinois at Chicago, School of Public Health, Chicago, Illinois.
- 1995-2003 **Chief of the Risk Evaluation Branch**
National Institute for Occupational Safety and Health, Education and Information Division, Cincinnati, Ohio.
- 2001-2002 **Visiting Scientist**
International Agency for Research on Cancer (IARC)
Cancer Identification and Evaluation Unit, Lyon, France
- 1989-1995 **Assistant Director for Risk Assessment**
National Institute for Occupational Safety and Health (NIOSH), Division of Standards Development and Technology Transfer, Cincinnati, Ohio.
- 1988-1989 **Assistant Section Chief**
National Institute for Occupational Safety and Health, Division of Surveillance, Hazard Evaluations and Field Studies, Industrywide Studies Branch, Cincinnati, Ohio.
- 1980-1988 **Epidemiologist**
National Institute for Occupational Safety and Health, Division of Surveillance, Hazard Evaluations and Field Studies, Industrywide Studies Branch, Cincinnati, Ohio

AWARDS AND HONORS

- 2013 H.A. Tyroler Distinguished Alumni, Department of Epidemiology, University of North Carolina at Chapel Hill
- 2012 NIOSH Alice Hamilton Science Award Winner
- 2011 Elected Fellow of the Collegium Ramazzini
- 2011 Agaur Fellowship from the Catalan Ministry of Education, Barcelona, Spain
- 2008 NIOSH Alice Hamilton Science Award Winner
- 2002 Honorable mention for the NIOSH Alice Hamilton Science Award

- 2001 Visiting Scientist Award of the International Agency for Research on Cancer (IARC) in Lyon, France.
- 2000 NIOSH Special Act Award for organizing workshop on “Future Research for Improving Risk Assessment Methods”
- 1999 NIOSH Nominee for the CDC Charles Shepard Award
- 1998 NIOSH Special Act Award for creating a risk assessment program
- 1996 Finalist CDC Statistical Science Award
- 1995 NIOSH Nominee for the CDC Charles Shepard Award
- 1994 NIOSH Alice Hamilton Science Award Winner
- 1993 NIOSH Alice Hamilton Science Award Winner
- 1993 NIOSH Nominee for the CDC Charles Shepard Award
- 1990 NIOSH Superior Performance Award
- 1989 NIOSH Alice Hamilton Science Award Winner
- 1989 NIOSH Special Service Award for Conduct of an investigation of nitroglycerin and cardiovascular mortality in munitions workers
- 1986 NIOSH Long Term Training Award
- 1977 Graduated Magna Cum Laude, University of Massachusetts

SERVICE

Member of the Governing Board of Epidemiology in Occupational Health (EPICOH).

Member of the U.S. EPA’s Scientific Advisory Board, Chemical Assessment Advisory Committee. December 2012- present.

Member of the Cochrane Editorial Board for Occupational Health and Safety.

Chair of of the International Agency for Research on Cancer (IARC) on IARC Monographs on Coffee and Hot Beverages, June 2016.

Member of the International Agency for Research on Cancer (IARC) on IARC Monographs on the Evaluation of Carcinogenic Risks to Humans Volume 111: Some nanomaterials and some fibres.” October 1-8, 2014, Lyon, France.

Chair of the Organizing Committee of the EPICOH 2014 Conference on “Challenges for Occupational Epidemiology in the 21st Century” in Chicago, June 24-27th, 2014.

Consultant to the New York City Health Department for their World Trade Center Cohort Studies. 2006 to present.

Member of the Scientific Advisory Committee for the Hebrew University Center of Excellence in Agriculture and Environmental Health. The Hebrew University of Jerusalem. June 2012 to present.

Member of the International Agency for Research on Cancer (IARC) Panel on Volume 100+, Mechanisms of Carcinogenesis, November 2012.

Chair of the Epidemiology Section for the International Agency for Research on Cancer (IARC) on the IARC Monograph on the Evaluation of Carcinogenic Risks to Humans on Metals, Particles and Fibers. Lyon, France: 17-24 March 2009.

Chair of the Epidemiology Section for the International Agency for Research on Cancer (IARC) on the IARC Monograph on the Ethylene Oxide, 1,3-Butadiene, Vinyl Chloride and other Vinyl Halides. Lyon, France: 4-12 June 2007.

Member of the Epidemiology Section for the International Agency for Research on Cancer (IARC) on the IARC Monograph on Man Made Mineral Fibres. Lyon, France: 2001.

Member of the Epidemiology Section for the International Agency for Research on Cancer (IARC) on the IARC Monograph on Styrene, Naphylamine and Some Mycotoxins and Herbal Medicines, Lyon, France: 2001.

Member of the Epidemiology Section for the International Agency for Research on Cancer (IARC) on the IARC Monograph on Tobacco Smoke. Lyon, France: 2002.

Member of the Epidemiology Section for the International Agency for Research on Cancer (IARC) on the IARC Monograph on Printing Processes and Printing Inks, Carbon Blacks and Some Nitro Compounds. Lyon, France: 1995.

Member of the National Research Council Committee to Review EPA’s Draft IRIS Assessment of Formaldehyde. August-January 2010.

Member of Expert Panel on Chrysotile Asbestos convened by Health Canada in Montreal on November 2007.

Member of the Scientific Advisory Board for the US EPA review of a “Proposed Approach for Estimation of Bin Specific Cancer Potency Factors for Inhalation Exposure to Asbestos”. Washington DC, 2008.

Consultant to the Centers for Disease Control, Center for Environmental Health on Studies of Children Exposed to Formaldehyde in Temporary Housing Units from Hurricane Katrina, 2007 to 2009.

Chair of Epidemiology Section for WHO Workshop on Mechanisms of Fibre Carcinogenesis and Assessment of Chrysotile Asbestos Substitutes Lyon, France: 8-12 November 2005.

Chair of the Epidemiology Section for the IARC Monograph meeting on Formaldehyde, Lyon, France 2-9 June 2004.

Member of the Institute of Medicine (NAS) Committee on the “Making best use of the Agent Orange exposure reconstruction model, 2007.

Member of the National Research Council (NAS) Committee on trichloroethylene. 2005- 2006.

Co-chair of a panel to review an EPA proposed “Protocol to assess asbestos risk” in San Francisco, California on February 26-27, 2003.

Leader of the NIOSH National Occupational Research Agenda (NORA) team on Risk Assessment Methodology. 1996 to 2003.

Member of the American Chemistry Council’s Epidemiology Topic Implementation (TIP) team. 2000-2002.

Head of the organizing committee for a workshop on “Future Research for Improving Risk Assessment Methods” that was held in Aspen, Colorado on August 16-18, 2000.

Consultant to the U.S. EPA’s Clean Air Scientific Advisory Committee (CASAC) on review of the “Health Risk Assessment Document for Diesel Exhaust. 1998.

Chair Adult Cancer Session for NIEHS EMF Epidemiology Meeting, 1998.

Task Group Member at the WHO Meeting on Environmental Criteria Document on Chrysotile Asbestos, July 1-6, 1996 in Geneva.

Task Group Member at the WHO Meeting on Environmental Health Criteria Document on Methylene Chloride. Frankfurt, Germany. March 1995.

Participant at the IARC Workshop on the Quantitation and Prediction of Carcinogenic Hazards in Humans, October 1993.

Task Group Member at the WHO/IPC Meeting on the Environmental Health Criteria Document (210) on Principles for the Assessment of Risks to Human Health from Exposure to Chemicals. Casharilton, England 1993.

Federal Liaison to the NRC Committee on Risk Assessment Methodology 1990-1993.

Testified for NIOSH at OSHA hearings on formaldehyde (May 5, 1986), cadmium (June 8, 1990), on 1,3-butadiene (January 17, 1991), methylene chloride (September 21, 1992) and glycol ethers (July 21, 1993).

Planning Committee Member for the 9th International Symposium on Epidemiology in Occupational Health. Cincinnati, Ohio, October 1992.

Co-organizer and Session Chair for Epidemiologic Methods Workshop. Cincinnati, Ohio, October 1992.

Co-organizer of a Symposium on Occupational Health Risk Assessment: Directions for the 90's, Boston, Massachusetts, May 27, 1992.

Member of the NIOSH Secondary Extramural Grant Review Committee 1987-1989.

Member of the Formaldehyde Panel, Workshop on the Contribution of Airborne Pollutants to Respiratory Cancer. July 1985, Snowbird, Utah.

Chairperson of the Epidemiology Sub-Group, Interagency Risk Management Group on Formaldehyde 1984.

UNIVERSITY/SCHOOL COMMITTEES

Member of the Promotion and Tenure Committee, University of Illinois at Chicago, School of Public Health from 2014-present.

Member of the Committee on Academic Progress, University of Illinois at Chicago, School of Public Health from 2012-2014.

Member of the Doctorate of Public Health Committee. University of Illinois at Chicago, School of Public Health from 2011-2012.

Member of the Executive Committee, University of Illinois at Chicago, School of Public Health from 2003-2010.

Member of the Curriculum Committee, University of Illinois at Chicago, School of Public Health, Division of Epidemiology and Biostatistics 2003-present.

EDITORIAL BOARDS

Associate Editor for the journal of Environmental Health

Section Editor for Occupational Health for Current Environmental Health Reports

Contributing Editor for the American Journal of Industrial Medicine

Editorial Board Human and Ecological Risk Assessment.

Editorial Board of the Archives of Occupational and Environmental Medicine.

Editorial Board of the Journal of Environmental Justice.

PROFESSIONAL AFFILIATIONS

Fellow of the American College of Epidemiology since 2003.

Fellow of the Collegium Ramazzini since 2010.

Member of the Society for Epidemiologic Research, American Public Health Association, International Society for Environmental Epidemiology and the International Commission on Occupational Health.

SCIENTIFIC JOURNAL PUBLICATIONS

PRESENTATIONS (Partial listing)

Epidemiologic methods for the studying the impact of agricultural practices on children's health. Invited Lecture at the University of Chicago, January 15, 2018..

Epidemiology and environmental health policy: The good, the bad and the ugly. Translating environmental epidemiology into prudent public policy: Caveats and minefields. University of Copenhagen, Denmark March 3, 2017 (invited lecture).

Epidemiologic methods for the studying the impact of agricultural practices on children's health. Invited Lecture at the University of Southern Denmark, Odense, Denmark April 27, 2017 (invited lecture).

The epidemiology of occupational exposure to respirable silica particles. Invited presentations at the International Commission on Occupational Health (ICOH) conference in Seoul, Korea, June 2015.

Exposure to the Herbicide Atrazine and the Risk of Adverse Birth Outcomes in the Midwestern, United States. The 2nd International Symposium on Agriculture and Environmental Health Rehovot, Israel, May 28, 2015.

Having an impact: Lessons learned from environmental epidemiology. Invited lecture delivered for the HA Tyroler Distinguished Alumni Award, University of North Carolina, School of Public Health, Chapel Hill, North Carolina, September 9, 2013.

Maternal exposure to disinfection by-products during pregnancy and micronuclei in maternal and cord blood lymphocytes. International Society for Epidemiologic Research (ISEE), September 14, 2011, Barcelona, Spain.

The worldwide pandemic of asbestos related diseases. International Agency for Research on Cancer. October 18, 2010, Lyon, France.

A meta-analysis of ovarian cancer and occupational exposure to asbestos. Epidemiology in Occupational Health (EPICOH) 2010, April 24, 2010, Taipei, Taiwan.

The worldwide pandemic of asbestos related diseases. Invited Keynote Lecture at the Asbestos Surveillance and Disease Compensation Think Tank sponsored by the Canadian Partnership Against Cancer. March 4, 2010, Toronto, Canada.

Meta-analysis of occupational epidemiologic studies. Division of Field Studies and Health Hazard Evaluations, National Institute for Occupational Safety and Health, Cincinnati, Ohio. May 22, 2009. (Invited Lecture)

Whither (or wither) occupational and environmental epidemiology? Alfred S. Evans Lecture, University of Michigan, Summer Epidemiology Program, Ann Arbor, MI, July 15, 2008.

Lung cancer in cadmium smelter workers exposed to cadmium and arsenic. Epidemiology in Occupational Health. June 13, 2008 in San Jose, Costa Rica.

What size asbestos fibers are most important for predicting human risk of lung cancer and asbestosis? International Commission on Occupational Health, June 14, 2006, Milan, Italy.

Current Controversies in Asbestos Research. Invited Talk at the American College of Occupational and Environmental Medicine (ACOEM), Chicago, Illinois, October 30, 2005.

Risk Assessment and Occupational Cancer. Ferguson-Glass Oration Keynote speech at The Royal Australasian College of Physicians. Wellington, New Zealand, May 11, 2005,

How Risky are Current Exposure Standards for Occupational Exposure to Silica? Keynote presentation at the Third International Symposium on Silica, Silicosis, Cancer and Other Diseases. Santa Margharita, Italy, November 25, 2002.

Methodologic Issues in Exposure-response Analyses of Epidemiologic Data. International Symposium on Epidemiology in Occupational Health, Barcelona, Spain, September 14, 2002.

Using Epidemiologic Data for a Risk Assessment of Silica Exposure. 2001 Symposium on Environmental Health and Occupational Risk Assessment. Beijing, China, April 26, 2001.

Epidemiologic Risk Assessment. Environmental Health Department Seminar at the University of Washington School of Public Health, Seattle, Washington, April 12, 2001.

Lung cancer risk among U.S. cadmium production workers. Workshop on work-related health risks due to cadmium and arsenic exposure: focus on cancer risk. Hennef, Germany, February 15, 2001.

Issues on using epidemiologic data in non cancer risk assessment. Non-Cancer Risk Assessment Workshop sponsored by the Ohio Chapter of the Society for Risk Analysis, Cincinnati, Ohio, July 13, 2000.

Methodologic and ethical issues in epidemiologic risk assessment for occupational hazards. Keynote invited presentation at the 14th International Symposium on Epidemiology in Occupational Health, Herzlia, Israel, October 13, 1999,

Using monte carlo methods to assess the impact of uncertainties in exposure on the analysis of dose-response in epidemiologic studies. Invited lecture at the Society for Risk Analysis Meeting. Phoenix, Arizona. December 8, 1998.

A monte carlo analysis of uncertainty related to misclassification of exposures in a cohort mortality study of railroad workers exposed to diesel exhaust. The 13th International Symposium on Epidemiology in Occupational Health. Helsinki, Finland, September 24, 1998.

Sources of uncertainty in dose-response modeling of epidemiologic data for cancer risk assessment. International Workshop on Uncertainty in the Risk Assessment of Environmental and Occupational Hazards, Bologna, Italy September 26, 1998.

Occupational Safety and Health Risk Assessment. Invited Lecture at the Boston School of Public Health. Boston, Massachusetts, March 16, 1998.

Issues in Utilizing Epidemiologic Data for the Quantitative Assessment of Occupational Risks. Epidemiology and Occupational Risks. Vienna, Austria, April 22, 1998.

Epidemiologic Approaches to Risk Assessment. Invited presentation at a seminar series for the Division of Epidemiology and Biostatistics at the University of Cincinnati, Cincinnati, Ohio, May 7, 1998.

A monte carlo analysis of uncertainty related to misclassification of exposures in a cohort mortality study of railroad workers exposed to diesel exhaust. Invited presentation at meeting on Diesel Exhaust Epidemiology at the Health Effects Institute (HEI), Boston, Massachusetts, April 20, 1998.

Occupational Risk Assessment. Lecture at the Second International Course on Health in Cold Environments. Kuusamo, Finland, February 1-8, 1998.

Epidemiologic Approaches to Risk Assessment. Invited Lecture at the Colloquium on Scientific Advances and the Future in Toxicologic Risk Assessment: 50th anniversary of the NRC's Committee on Toxicology; Washington, D.C., December 4-5, 1997.

Human cancer risk and exposure to 1,3-butadiene: A tale of mice and men. The 12th International Symposium on Occupational Health. Harare, Zimbabwe, August 18, 1997.

Approaches to cancer risk assessment of 1,3-butadiene using animal and human studies. The 1997 Annual Summer Toxicology Forum meeting. Aspen, Colorado, July 11, 1997.

Risk assessment activities at NIOSH. Invited Lecture for course on risk assessment at the University of Cincinnati, Department of Environmental Health, May 27, 1997.

Using epidemiologic data for the quantitative assessment of human risk. Environmental and Occupational Health Sciences Institute/ National Institute of Environmental Health Sciences Seminar; Piscataway, New Jersey, April 17, 1997.

The evaluation of datasets for dose-response assessment. Society for Risk Analysis Annual Meeting, New Orleans, Louisiana, December 10, 1996.

The molecular epidemiology of asbestos and other fibers. Harvard School of Public Health Symposium, Boston, Massachusetts. October 8, 1996.

An exposure-response analysis of respiratory disease risk associated with occupational exposure to chrysotile asbestos. Inhaled Particles VIII: Occupational and Environmental Implications for Human Health Conference. Cambridge, England, August 27, 1996.

The NIOSH risk assessment for diesel exhaust exposure and lung cancer risk among miners. Workshop on miners exposed to diesel particulates. Beckley, West Virginia, September 11, 1995.

Risk assessment methods for respiratory diseases. American College of Chest Physicians. Fifth International Conference on Environmental and Occupational Lung Diseases. Orlando, Florida, March 25, 1995

Approaches for assessing the efficacy of occupational health and safety standards. Workshop on Intervention Research in Occupational Health. Wheeling, West Virginia, October 17, 1994.

An exposure-response analysis of risk of respiratory diseases associated with occupational exposure to chrysotile asbestos. Tenth International Symposium on Epidemiology in Occupational Health. Como, Italy, September 23, 1994.

Asbestos: Unsafe by any name. Ninth Occupational Safety and Health Conference, San Juan, Puerto Rico, December 10, 1993.

A dose-response analysis and quantitative risk assessment of lung cancer risk and occupational cadmium exposure. Invited Lecture West Virginia University School of Medicine. Morgantown, West Virginia, November 29, 1993

Overview of statistical methods for modeling risk using epidemiologic data. Workshop on Epidemiologic Methods, Cincinnati, Ohio, September 22, 1992.

An exposure response analysis of cancer mortality among a cohort of workers exposed to ethylene oxide. Epidemiology in Occupational Health, 9th International Symposium, Cincinnati, Ohio, September 25, 1992.

Methods for Modeling Occupational Cohort Mortality Studies for Quantitative Risk Assessment. Occupation Health Risk Assessment : Directions for the 90's, Boston, Massachusetts, May 27, 1992.

NIOSH Risk Assessment Methods. American Industrial Hygiene Conference and Exposition, Boston, Massachusetts, June 3, 1992.

The NIOSH Approach to Quantitative Risk Assessment. USPH Professional Association, 27th Annual Meeting, Cincinnati, Ohio, April 26, 1992.

Methodologic Issues in Using Occupational Epidemiologic Data for Cancer Risk Assessment. Society for Risk Analysis Annual Meeting, Baltimore, Maryland, December 10, 1991.

A dose-response analysis and quantitative risk assessment of lung cancer risk and occupational cadmium exposure. Cadmium in the Human Environment : Toxicity and Carcinogenicity, Gargnano, Italy, September 27, 1991.

A dose-response analysis and quantitative risk assessment of lung cancer risk and occupational cadmium exposure. Eighth International Symposium on Epidemiology in Occupational Health, Paris, France, September 11, 1991. A dose-response analysis and quantitative risk assessment of lung cancer risk and occupational cadmium exposure.

Methodologic Issues in Epidemiologic Risk Assessment. Conference on Chemical Risk Assessment in the DoD : Science, Policy and Practice, Dayton, Ohio, April 10, 1991.

Cardiovascular mortality of workers exposed to nitroglycerin and dinitrotoluene. 23rd International Congress on Occupational Health, Montreal, Canada, September 1990.

Risk assessment activities at NIOSH - - Information Resources and Needs. Use of Information Resources in Assessing Health Risks from Chemical Exposure Conference, Oak Ridge, Tennessee, June 1990.

Health Risks of Diesel Exposure. Salt Institute Annual Meeting, Sarasota, Florida, March 1990.

Human studies of formaldehyde and cancers of the respiratory tract. Nasal Carcinogenesis in Rodents : Relevance to Human Health Risks, Velhoven, Netherlands, October 1988.

A retrospective cohort mortality study of workers exposed to formaldehyde in the garment industry. Society for Epidemiologic Research, Annual Meeting, Pittsburgh, Pennsylvania, June 1986.

Mortality and industrial hygiene study of phosphate workers. Third NCI/EPA/NIOSH Collaborative Workshop : Progress on Joint Environmental and Occupational Cancer Studies, Bethesda, Maryland, March 1984.

A retrospective cohort mortality study of a phosphate fertilizer facility. American Public Health Association, Annual Meeting, Dallas, Texas, November 1983.

The carcinogenicity of formaldehyde. National Conference on Formaldehyde and Building - Related Illness, Indianapolis, Indiana, March 1982.

TEACHING EXPERIENCE

University of Illinois At Chicago, School Of Public Health – Systematic Reviews and Meta-analysis. 2015-present.

University of Illinois At Chicago, School Of Public Health – Advanced Cancer Epidemiology 2012-present.

University of Illinois At Chicago, School Of Public Health – Applied Methods in Epidemiology 2012-present

University of Illinois At Chicago, School Of Public Health - Methods in Occupational Epidemiology. 2010 –present.

University of Illinois At Chicago, School Of Public Health - Advanced Methods in Epidemiology. 2007-2009.

University of Illinois At Chicago, School Of Public Health – Introduction to Epidemiology, 2003-2006.

University of Michigan School of Public Health- Summer Program Course on Environmental Epidemiology and Risk Assessment in 1996-2008.

Lecturer in course on Epidemiology and Planning of Silica Research Studies. October 22nd, 2002, Santa Margherita, Italy.

Lecturer in course on New Methods in Epidemiology. September 14, 2011, Barcelona, Spain.

Instructor in NIVA Course on Risk Assessment and Risk Management In the Working Environment, Denmark, 1995, 1997 and 2000.

Instructor in NIVA Course on Cancer Risk Assessment. Finland, 2000.

Instructor in IARC Course on Advanced Methods in Occupational Epidemiology, Lyon, April 3-7, 1995.

Lecturer on Epidemiologic Risk Assessment at a Course on Risk Assessment at the Annual Meeting of the Society for Risk Analysis, December, 1991.

Instructor on Epidemiology and Risk Assessment at the Workshop on Occupational Safety and Health Programming, San Juan, Puerto Rico, June 17, 1991.

GRADUATE STUDENT THESIS, OR DISSERTATION COMMITTEES

Judith Graber. Role: Doctoral Dissertation Committee Chair. Program: Division of Epidemiology and Biostatistics, UIC School of Public Health. Defended: 2012. Dissertation Title: Respiratory morbidity and mortality among underground miners.

Glen Schumock. Role: Doctoral Dissertation Committee Chair. Program: Division of Epidemiology and Biostatistics, UIC School of Public Health. Defended: 2012. Dissertation Title: Association between leukotriene modifying agents and suicide in patients with asthma.

Kirsten AlMBERG. Role: Master Thesis Committee Chair. Program: Division of Epidemiology and Biostatistics, UIC School of Public Health. Defended:2012. Thesis Title: A linkage study of adverse birth outcomes with agricultural land use practices in Missouri.

Mary Doi. Role: Master Thesis Committee Chair. Program: Division of Epidemiology and Biostatistics, UIC School of Public Health. Defended:2010. Thesis Title: Rapid and conventional measures of fecal indicator bacteria as predictors of protozoan pathogen presence in recreational surface waters.

Jamie Slaughter. Role: Member Doctoral Dissertation Committee. Defended:2010. Dissertation Title: Prenatal Case Management, Dosage, Selection Bias, and Pregnancy Outcomes.

Maria Constanza Camargo. Role: Member Doctoral Dissertation Committee. Defended:2010. Dissertation Title: The role of EBV in gastric carcinogenesis epidemiologic modeling and molecular investigations.

Charlotte Joslin. Role: Member Doctoral Dissertation Committee. Defended:2009. Dissertation Title: The association between Acanthamoeba keratitis and domestic water exposure in the Chicago area.

Kamal Eldeirawi. Role: Member Doctoral Dissertation Committee. Program: Division of Epidemiology and Biostatistics, UIC School of Public Health. Defended:2006. Thesis Title: Asthma in children of Mexican descent.

Eileen Kuempel. Role: Member Doctoral Dissertation Committee. Program: University of Cincinnati, Kettering Labs. Defended: 1997. Dissertation Title: Development of a biomathematical lung model to describe respirable particle retention and to investigate exposure, dose, and disease in United States coal miners.

Nitrate in drinking water and the risk of adverse birth outcomes

Nitrate is the most commonly found contaminant in the world's aquifers and a major source of contamination of drinking water in the United States. There is suggestive evidence that maternal consumption of drinking water contaminated with nitrate is associated with an increased risk of adverse birth outcomes (i.e. preterm birth, low birth weight and birth defects), but most of these studies were limited by their small size, uncertain estimates of nitrate exposure, and lack of information on other risk factors and dietary sources of nitrate. This study, which will include over 1 million births in Denmark with comprehensive information on exposure to nitrate from water and diet and other risk factors for these outcomes, will be the most informative study concerning this issue that has ever been conducted.

T42/OH008672 NIOSH OE Stayner (PI) 7/1/08 - 6/30/19
Occupational and Environmental Epidemiology Program

This training program that leads to a master of science (MS), doctorate (PhD) and post-doctoral training in Occupational and Environmental Epidemiology. The primary goal of this academic training program is to develop highly qualified scientists with training and an interest in research on OEE.

Role: Director

Completed

Contract # 200-2010-37442 Stayner (PI) 9/30/10 - 9/29/13
Centers for Disease Control and Prevention
A Linkage Study of Health Outcome Data in Children and Agricultural Water Contamination Data in the Midwest.

This project involved a series of studies of the linkage between adverse health outcomes in children and exposure to agricultural water contaminants in the Midwest, particularly atrazine and nitrate. The study's second objective is to advance the methodology of water contaminant and health data linkage studies for the CDC Environmental Public Health Tracking (EPHT) Program and state health departments.

Role: PI

Alpha Foundation R. Cohen (PI) 11/1/13 – 10/31/15
*Clarifying distribution, trends, and determinants of adverse health in US miners:
Exploration and clinical materials.*

The goal of this project is to analyze existing data sources individually, then link them together to study work-related and individual risk factors for respiratory and cardiovascular disease in U.S. miners. This knowledge can then be used to guide interventions to reduce the burden of these diseases.

Role: Co-I

National Children's Study Holl (PI) 9 /28/07-9/28/12

Northwestern University, UIC SPH and UIC COM were full partners in the greater Chicago NCS Consortium. In this role, UIC faculty will lent their epidemiologic and clinical expertise to the ongoing oversight of the greater Chicago NCS Consortium planning as well as implementation.

Role: Co-I

Epidemiological Study of Recreational Use of the Chicago Area Waterways

The purpose of this study is to determine rates of acute gastrointestinal and non-gastrointestinal illness attributable to recreation on the CAWs and to define the relationship between concentrations of microbes and rates of illness among individuals with limited recreational water contact. This study also aims to identify pathogens responsible for acute infections among recreators, and to evaluate water reclamation plants as sources of those pathogens.the impact of water pollutants on the health of participants.

Role: Co-I
