Interest Summary My research focuses on how government policies and programs affect individual choices and behaviors. I view the government as the biggest entity in society. Therefore, no matter how small the policy is, millions of people are affected. Specifically, I exploit the effect of the Children's Health Insurance program on people's working hours. Whether the Affordable Care Act has affected labor participation rates.

Education

University of Illinois Chicago
Ph.D., Health Policy, 2025.
Fields: Health policy, Health Economics

University of Wisconsin-Madison
Master of Economics, 2020.

University of Iowa
B.B.A, Finance, 2018.
